10/21/11

Since using Section Seven Software, we have been able to quote all government and commercial contracts much faster than ever before. The Section Seven Software is worth the investment and it does everything we need it to do.

We have been pleased with Lee Levinstein's ability to stay ahead of upcoming changes which keeps the software current and evolving all the time. Lee's customer service has been terrific and he is always available when you need him. Since using the software, Lee has helped us custom enhance certain modules to better meet our needs.

I would highly recommend Section Seven Software to anyone who wants to maximize their time and efforts and organize quotes into a very easy to use system.

**Sincerely,
Randy Solinger – Vice President
B&E Mfg Co**
